

ASSET MANAGEMENT SOLUTION

Raapyd's Asset Management Services can be seamlessly integrated with any ERP, CRM, ECM, or third-party applications. These services involve the organized oversight of a company's assets, which includes tangible items like buildings and equipment, as well as intangible elements such as intellectual property and financial holdings.

Why Raapyd AMS

Inventory Management:

Monitor inventory levels, reorders, and supplier info for optimization.

Planned and Scheduled maintenance:

Organize, schedule, and assign tasks to maintenance personnel.

Compliance Management:

Maintain records for regulatory compliance and safety standards.

Reporting & Analytics:

Analyze asset performance for data-driven decision-making.

Integration with Systems:

Connect with ERP and CRM systems for a holistic view.
