DISTRIBUTION MANAGEMENT SOLUTION

Raapyd's Distribution Management System is built on a platform with the capability to adapt to any existing system. DMS is designed to efficiently embrace any technology a business requires, from AI and ML to seamless integration with your core systems. It offers the ability to establish a partner hierarchy and provide partners with access to self-service features.

Why Raapyd DMS

Real-time Monitoring & Control:
Real-time visibility and control for swift reactions.

Demand Planning & Forecasting:
Forecast demand, and optimize inventory, and routes.

Warehouse Management:
Efficiently handle inventory, picking, and shipping.

Pricebook Support:
Generate custom price books with unique partner and product discounts.

Reports and Analysis:
Generate analytical reports for partner performance, forecasts, and trends.
