

ACCELERATED SOLUTION FOR DISCRETE MANUFACTURING

In a hypercompetitive environment for manufacturers, speed is increasingly critical. Product life cycles are getting shorter, batches smaller and client/market demands changing ever more rapidly. Trends that are emerging in manufacturing. The drastic change in the customer demands expect intelligent, advanced and customized solutions.

To meet these demands, manufacturing is being used as a strategic pillar, becoming more collaborative, localized, automated, integrated, and highly adaptive.

Accely's Accelerated Discrete Manufacturing Solution is SAP S/4HANA-based All-in-One ERP solution that enables industrial and discrete manufacturing companies to streamline operations, providing greater visibility and control of core business processes. The solution can be deployed to provide innovation, acceleration, and value as well as provide enhanced capability maturity for companies at any stage of development. It eliminates the buffer time, cost and leads to the path of growth.

Accely's this pre-package solution understands and enables clients to equip for future challenging needs by increasing agility and extending the manufacturing network.

THE VALUE PROPOSITION

KEY BENEFITS

1

Reduce Production & Supply Chain Costs

2

Traceability - Every Step of The Production Process Must Be Transparent Through Machine Integration With Multiple Systems

3

Required Customizable And Easily Adaptable as Per Product Life Cycle

4

Satisfy an Avalanche of Customer Demands & Regulatory Requirements

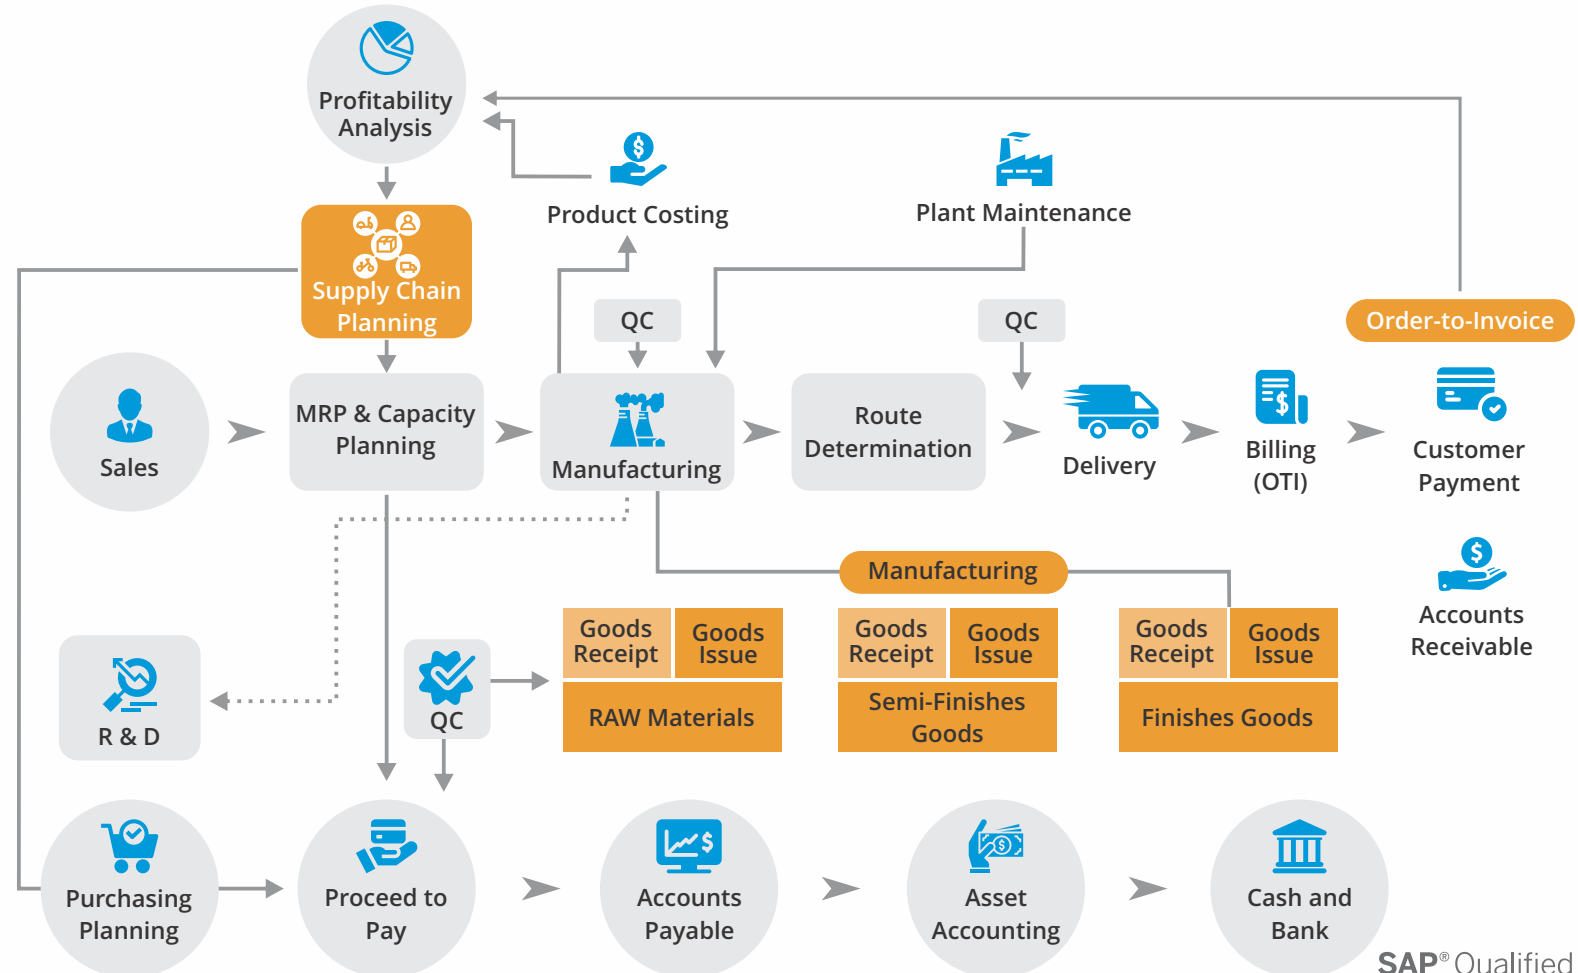

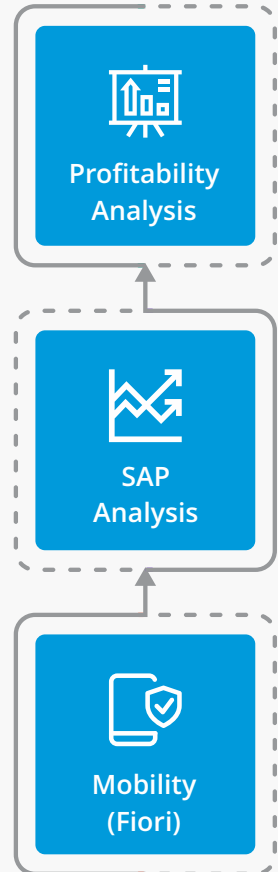

5

Drive to Optimize Manufacturing Processes in Order to Increase Agility & Ride The Efficiency Curve to Serve The Customer Better

6

Accelerated On-Time Delivery, Business Integration and Customer Satisfaction

IMPLEMENTATION END-TO-END SOLUTION MAP

OUR OFFERINGS

Accely provides preconfigured templates,
to ensure quick scoping and delivery of the engagement

Accelerated Pre-Figured Template

Financial Accounting

- Financial Accounting
- Purchase Accounting
- Sales Accounting
- Expense Accounting
- Capital Expenditure Accounting
- Consolidation and Finalization of Accounting

Order to Cash

- Sales Order Processing
- Finished Goods
- Stock Management
- Receivables – Collections & Credit Management
- Pricing & Promotions
- Rebates and Discounts
- Sales Administration
- Sales MIS

Procure to Pay

- Purchase Inventory Management
- Stores Management
- Vendor Management
- Materials Accounting
- Additional Functionality in Purchase & Inventory Management

Manufacturing

- Production Planning
- Capacity Planning
- Shop Floor Control

Pre-Packaged Offerings

**No Need to Maintain
Software /Hardware**

**Best Practices in
Implementation**

Faster Time to Value

**Agility to Respond to Change
in Business Requirements**

Unique Benefits

GST IMPACT ON BUSINESS

Meeting up all the India localization requirements.

Purchasing & Supply Chain

- Inter-state procurement could prove viable.
- May open opportunities to consolidate suppliers/vendors.
- Additional duty/CVD and Special Additional duty components of customs duty to be replaced.
- Changes in tax system could warrant changes in both procurement and distribution arrangements.
- Current arrangements for distribution of finished goods may no longer be optimal with the removal of the concept of excise duty on manufacturing.
- Tax savings resulting from the GST structure would require repricing of products.
- Margins or price mark-ups would also need to be re-examined.
- Removal of the concept of excise duty on manufacturing could result in improvement in cash flow and inventory costs as GST would now be paid at the time of sale/supply rather than at the time of removal of goods from the factory.
- Potential changes to accounting and IT systems in areas of master data, supply chain transactions, system design.
- Existing open transactions and balances as on the cut-off date need to be migrated out to ensure smooth transition to GST.
- Changes to supply chain reports (e.g., purchase register, sales register, services register), other tax reports and forms (e.g., invoices, purchase orders) need review.
- Appropriate measures such as training of employees, compliance under GST, customer education, and tracking of inventory credit are needed to ensure smooth transition to the GST regime

Accely offers Accelerated GST and E-invoicing Solutions

SAP E-INOVICE

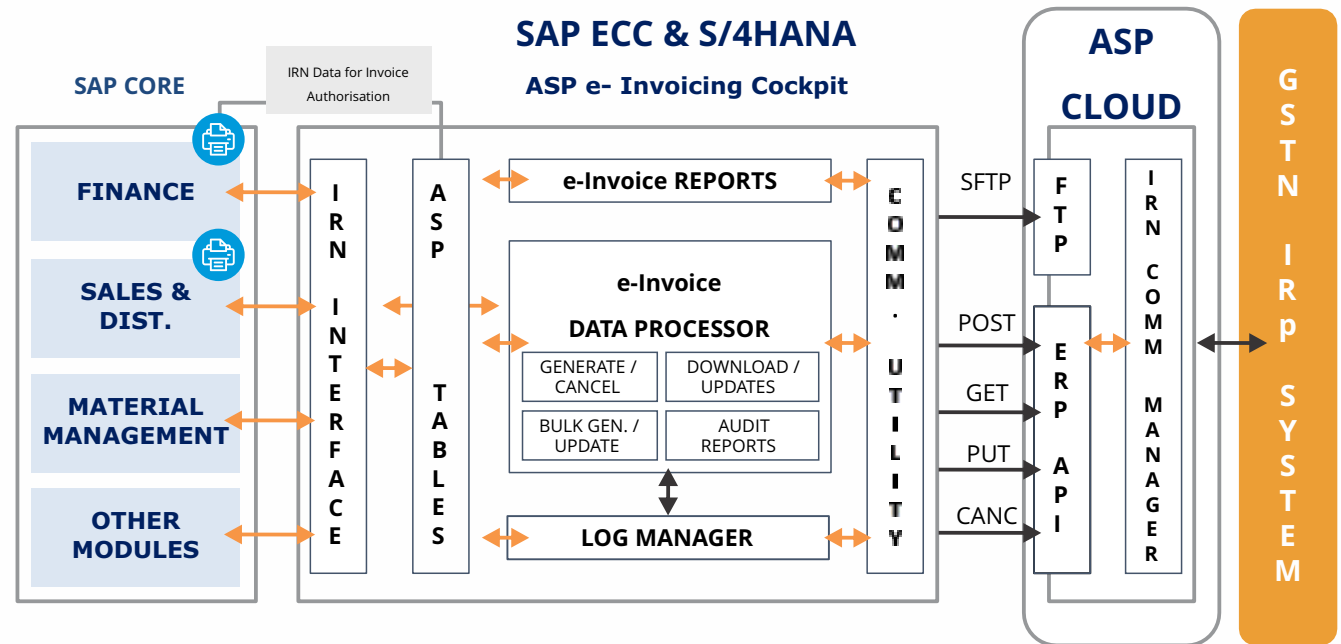

COMPONENT FRAMEWORK

KEY FEATURES

- Seamless Integration with ERP's/billing system
- Auto Exclusion of documents not required for IRN
- Configure Data Validation Checks
- Auto Generation of IRN
- Cancellation of IRN
- Reverse Integration with ERP's
- Quick to Deploy, Scalable
- Data accuracy and real time monitoring
- User intuitive and cost effective
- Works with all versions of SAP ECC and S/4 HANA
- We provide the end-to-end solution

KEY BENEFITS

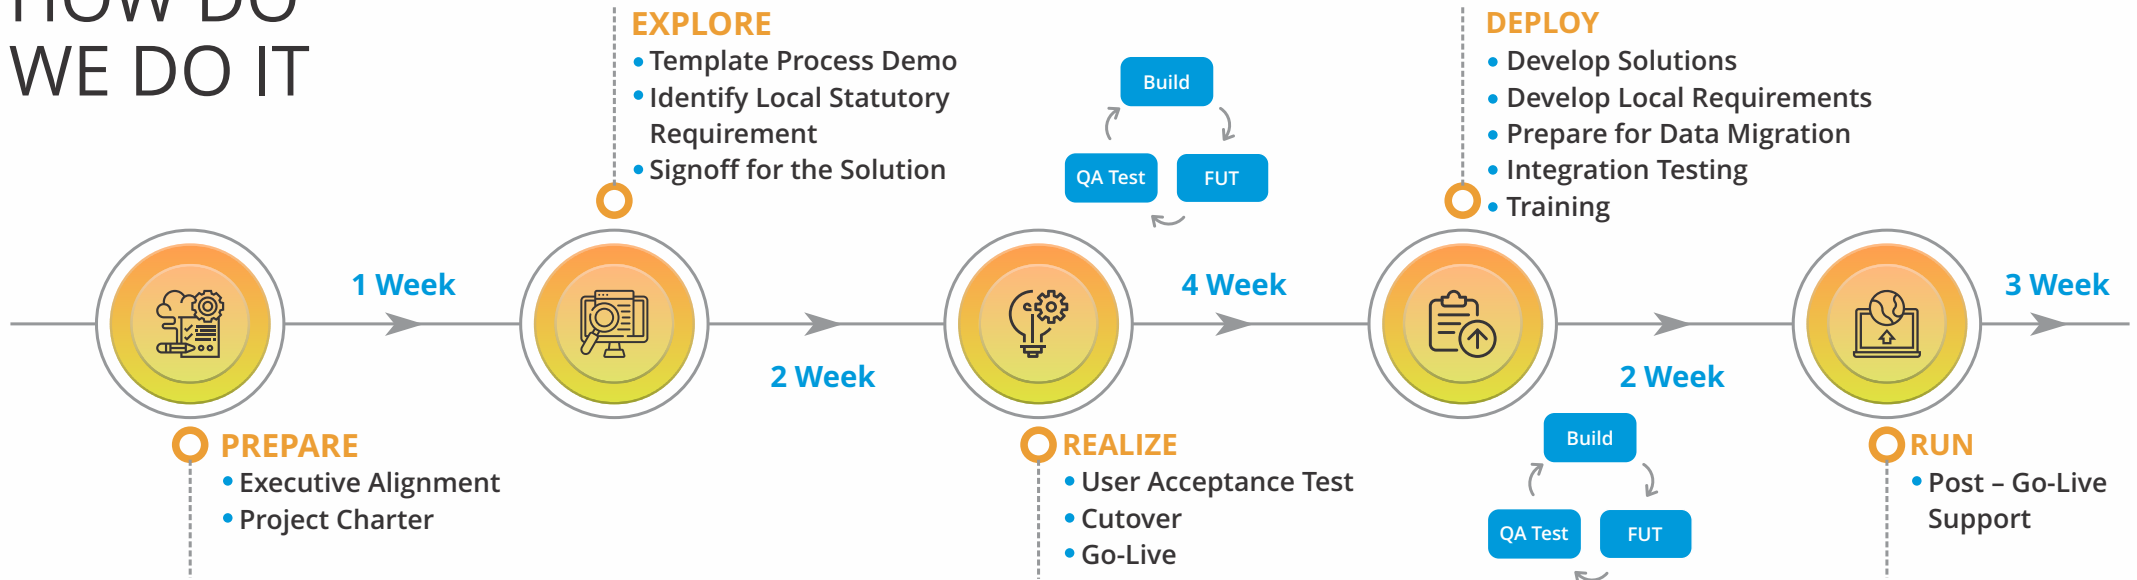

- Comprehensive solution for end-to-end IRN compliances
- Flexible options for ERP integration - Flat file, API based, Manual
- Option of Cloud or On-premise deployment models
- User interface can be Cloud or SAP
- Extensive validation checks performed to ensure legal accuracy of data
- Option to pick and choose required validation checks
- Ease of maintenance and implementation since solution would handle encryption/decryption protocols published by IRP
- No investment during development or updation is required at the source system level
- Bulk generation of IRN is possible
